| Corona, NY | christophergonzalez246810@gmail.com | [Portfolio](#) | [LinkedIn](#)

Education

New York City College Technology (Expected Spring 2026)

- Bachelor of Technology Computer Systems Technology

Relevant Coursework: Data Analysis, Business Intelligence, Software Development, Project Management

Year Up United (September 2023-July 2024)

- Software Development Certificate: Full Stack Development

Borough of Manhattan Community College (September 2019-Graduated June 2022)

- A.A.S Computer Information Systems Degree

Tech Projects

NBA RAG Chatbot | Python, OpenAI API, Vector Embeddings [NBA-rag-chatbot](#)

- Developed an AI-powered Retrieval-Augmented Generation (RAG) chatbot that uses semantic search and OpenAI embeddings to answer NBA player questions.
- Implemented vector similarity retrieval and embedding caching to improve chatbot response accuracy and performance.

CSV Chart Generator | JavaScript, Chart.js, HTML, CSS [CSV Chart Generator](#)

- Built a web-based CSV Chart Generator that converts uploaded datasets into interactive visualizations using Chart.js and dynamic JavaScript processing.
- Implemented logic to analyze CSV data and automatically suggest chart types based on numeric and categorical columns, improving data visualization and user experience.

Experience

Fox News

Manhattan, NY

Help Desk Intern

September 2025-November 2025

- Imaged 20+ laptops daily with company standard OS and applications, ensuring devices were secure and newsroom ready. Configured authentication tools such as CrowdStrike and multi-factor authentication to protect user accounts
- Managed IT support requests in ServiceNow, documenting and resolving hardware, software, and account issues under tight deadlines
- Assisted with audio-visual setup for conference rooms and live broadcasts, configuring projectors, cameras, microphones, and video conferencing systems.

Tempo Glass Foundation LLC

Flushing, NY

IT Intern

June 2025-Aug 2025

- Implemented a Retrieval-Augmented Generation (RAG) approach in Azure OpenAI chatbot, tuning prompts and adjusting model settings to improve price-related responses by 85%. Optimized SQL-based retrieval pipelines to ensure accurate glass pricing and minimize user confusion.
- Built and maintained workflows using Power Automate, integrated with Power Apps and SharePoint, to automate defect report submissions and email notifications.
- Built and enhanced business applications using coding (JavaScript, HTML, CSS) and low-code platforms (Power Apps, Power Automate)

Skills

AI & Data Technologies: Azure OpenAI (RAG Chatbots) | OpenAI API | Prompt Engineering | RAG Pipelines | Vector Embeddings | Conversational AI | AI Workflow Automation | Semantic Search | Data Analytics | Data Visualization | Predictive Analysis | Machine Learning (Foundations) | Model Optimization | Google Cloud | Git | GitHub Copilot | Claude | Claude Code | Gemini | Cursor | Zapier | Anthropic

Programming Languages & Tools: Python | JavaScript | HTML/CSS | SQL | NoSQL (MongoDB, Neo4j) | JSON | Node.js | Power BI | Tableau | Excel | SSIS | SSAS | SSRS | ETL Pipelines | Power Apps | Power Automate | SharePoint | ServiceNow | Visual Studio | GitHub | Microsoft 365
