---

## Education

### New York City College Technology (Expected Spring 2026)

- Bachelor of Technology Computer Systems Technology  
Relevant Coursework: Statistics, Data Visualization, Database Administration, Business Intelligence, Data Mining

### Year Up United (September 2023-July 2024)

- Software Development Certificate: Full Stack Development

### Borough of Manhattan Community College (September 2019-Graduated June 2022)

- A.A.S Computer Information Systems Degree
- 

## Experience

### Fox News

Manhattan, NY

### Help Desk Intern

September 2025-November 2025

- Imaged 20+ laptops daily with company standard OS and applications, ensuring devices were secure and newsroom ready. Configured authentication tools such as CrowdStrike and multi-factor authentication to protect user accounts
- Managed IT support requests in ServiceNow, documenting and resolving hardware, software, and account issues under tight deadlines
- Assisted with audio-visual setup for conference rooms and live broadcasts, configuring projectors, cameras, microphones, and video conferencing systems.

### Tempco Glass Foundation LLC

Flushing, NY

### IT Intern

June 2025-Aug 2025

- Implemented a Retrieval-Augmented Generation (RAG) approach in Azure OpenAI chatbot, tuning prompts and adjusting model settings to improve price-related responses by 85%. Optimized SQL-based retrieval pipelines to ensure accurate glass pricing and minimize user confusion.
  - Built and maintained workflows using Power Automate, integrated with Power Apps and SharePoint, to automate defect report submissions and email notifications.
  - Built and enhanced business applications using coding (JavaScript, HTML, CSS) and low-code platforms (Power Apps, Power Automate)
- 

## Projects

### Video Game Sales Data Warehouse & Analytics (SQL Server, SSIS, SSAS, Excel, Visual Studio) [Link](#)

- Designed a star-schema data warehouse in SQL Server from scratch using ERD+, building a staging table, 2-dimensional tables, and a Fact Sales table to store and organize 8,920+ global video game sales records.
  - Built an automated ETL pipeline using SSIS to extract raw data, clean error rows in Excel, and load transformed data into the warehouse enforcing data integrity through primary and foreign key constraints.
  - Created an OLAP cube in SSAS to slice sales across 30+ platforms and 12 genres, then used Excel PivotTables to surface key insights finding PS2 led all platforms at \$1,255M in global sales and recommending NA and EU as priority markets.
- 

## Certifications

Google Coursera Data Analytics | Google Coursera BI | Year Up Software Development Certificate | Year Up CIS 301 Software Testing | Year Up CIS 101 Computer Applications | New York Job Council Gen AI Workshop |

---

## Skills

**Data:** Statistical Modeling | Data Warehouse | Data Analysis | ETL Pipelines | Data Cleaning | AI | RAG | Statistical Analysis | SSIS (ETL) | SSAS | SSRS (Reports) | CRM |

**Tools:** Visual Studio | SQL (Microsoft SQL Server, Oracle) | Google Cloud | AWS | NoSQL (MongoDB, Neo 4j) | Tableau | Power BI | Excel (Pivot Tables, Power Query) | Google Workspace | Microsoft 365 | SQL Server Management Studio | Linux | Looker Studio | JSON | Weka | Azure Open AI | GitHub Co Pilot | Git | Claude | Anthropic | Cursor | Zapier | Power Platform | Gemini | Service Now | Jira | Python | Java | HTML | CSS | JavaScript | Bash | Node.js
